Executive Summary

The Tennessee Department of Education (department) produces an annual virtual education report to highlight strides made to strengthen public virtual education across the state. This report provides information relative to the operation and viability of public virtual schools and virtual education programs in Tennessee. In compliance with state statute¹, the report provides information relative to student enrollment, academic performance, and funding for virtual education. Additional information related to virtual education is available on the department's [virtual school webpage](#).

Highlights in Public Virtual Education

- The number of public virtual schools increased by 103% from 28 schools in 2020-21 to 57 schools in 2021-22.
- Enrollment in Tennessee public virtual schools increased from 10,589 students in 2020-21 to 17,906 students in 2021-22.
- Approximately one-third of Tennessee public non-virtual high schools offered online or distance learning courses in addition to traditional in-person courses during the 2021-22 school year.
- Approximately 28% of students enrolled in a virtual school did not remain enrolled in the school for the entirety of the school year which is significantly higher than students enrolled in a non-virtual school (14%).
- Approximately one-third of public virtual schools achieved a school-wide Tennessee Value-Added Assessment System (TVAAS) composite score of 3 or greater, indicating academic growth. Virtual schools and non-virtual schools showed comparable school-wide TVAAS composite growth score results when evaluated against their respective Local Education Agencies (LEAs).
- To ensure that all Tennessee students receive high-quality educational services regardless of instructional modality, the department established a team specifically tasked with providing oversight and support to public virtual schools.
- To strengthen public virtual education, the department has implemented a virtual school monitoring process that analyzes the operational, academic, and fiscal viability of a virtual school and prompts LEA and school leaders to formulate action steps relative to the monitoring findings.

¹ T.C.A. § 49-16-104

Divisions of Virtual Education

The Tennessee State Board of Education's rules² divide virtual education into two different categories: public virtual schools and virtual education programs. This differentiation provides both local education agencies (LEAs) and non-virtual schools flexibility to offer virtual education to their students as needed. LEAs may establish and operate a **public virtual school** to deliver instruction to students primarily via the internet in a virtual or remote setting. Public virtual schools are held to the same operational and accountability standards as public non-virtual schools.

Public virtual schools must provide access to courses, materials, and instruction in a primarily virtual manner. Students enrolled in a virtual school may attend a portion (less than half) of their classes in person within a brick-and-mortar (non-virtual) location if needed. Students may choose to remain enrolled in a public non-virtual school and still participate in virtual education through a **virtual education program**. Non-virtual schools may operate a virtual education program to provide their students access to virtual courses. Both public virtual schools and virtual education programs provide students with a broader range of educational opportunities and the flexibility to progress at their own pace. Unlike virtual schools, virtual education programs are not separate schools and must operate as part of a non-virtual school. During the 2021-22 school year, one-third of Tennessee public high schools offered online or distance learning courses through a virtual education program in addition to traditional in-person courses. In total, approximately 54% of LEAs provided students with access to a virtual education program through a non-virtual school to expand curricular offerings during the 2021-22 school year.

Operation and Establishment of Virtual Education

The department has created a thorough application process by which LEAs must apply for a school number for their virtual school. During the application process, LEAs must submit evidence showing that the school's academic, operational, and fiscal practices will align with all applicable statutes and rules that govern public virtual schools in Tennessee. LEAs may utilize TISA funds to implement and operate both public virtual schools and virtual education programs.

More than half of LEAs in Tennessee offer access to virtual courses through either a public virtual school or a virtual education program as a flexible choice for their students and families. LEAs may staff and manage public virtual schools with personnel employed by the LEA or may contract management services with another entity. Regardless of the management entity, all public virtual schools must comply

² SBE rule 0520-01-03-.05

with the same laws, rules, and regulations as traditional public schools. Access to virtual education provides Tennessee students with a personalized pathway to learning that is not constrained by geography or a traditional bell schedule. Both virtual schools and non-virtual schools can provide students with access to a variety of instructional modalities including:

- **Synchronous Virtual Course:** *a fully online/virtual course in which a student can progress independently through coursework and requires students to attend regularly scheduled (daily/every other day) virtual classes with a teacher.*
- **Asynchronous Virtual Course:** *a fully online/virtual course in which a student can progress independently through coursework and does not require students to attend regularly scheduled (daily/every other day) virtual classes with a teacher.*
- **Bisynchronous Virtual Course:** *a fully online/virtual course utilizing a mixture of asynchronous and synchronous instruction.*
- **Hybrid Virtual Course (allowable in public virtual schools only):** *a course that offers primarily virtual instruction (asynchronous, synchronous, or bisynchronous) and requires students to periodically attend class in person within a brick-and-mortar location.*

Virtual education promotes flexibility in academic advancement by allowing students to learn at their own pace in a setting of their choice. Virtual schools and virtual education programs are required to comply with federal laws addressing special populations, including the Individuals with Disabilities Education Act (IDEA), and must provide all services required by a student's Individualized Education Program (IEP), Section 504 Plan, or Individualized Learning Plan (ILP). Therefore, students with unique learning needs, including those with disabilities and limited English proficiency, may enroll and participate in a public virtual school or virtual education program.

Public Virtual School Enrollment

The number of Tennessee public virtual schools increased by 103% from 28 schools across 25 LEAs in 2020-21 to 57 schools across 49 LEAs in 2021-22. Enrollment in public virtual schools increased 69% from 10,589 in 2020-21 to 17,906 enrolled students in 2021-22. Student participation in virtual education, specifically virtual schooling, has seen a continuous upward trend across years as seen in Figure 2.

Figure 1. Openings and Closings of Virtual Schools Across Years

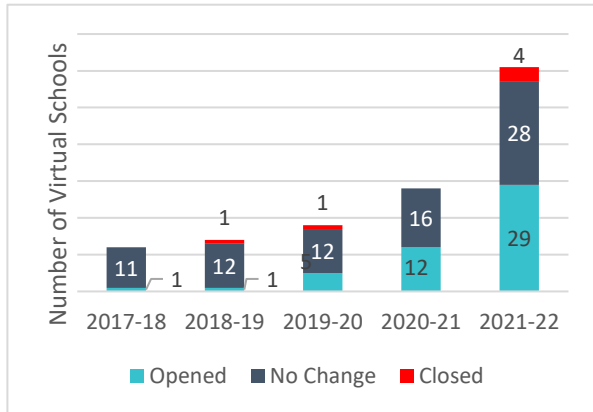

Figure 2: Virtual School Enrollment – Across Years

In the 2021-22 school year, 28% of virtual schools offered a statewide enrollment option for any student residing in the state that meets the school’s enrollment criteria. LEAs that allow out-of-district or state-wide enrollment may charge tuition to families for the portion of funding that the LEA receives from local city or county taxes. LEAs that operate a virtual school are not required to offer out-of-district or state-wide enrollment options. As shown in figure three, 58% of public virtual schools operating in the 2021-22 school year did not offer out-of-district or statewide enrollment opportunities.

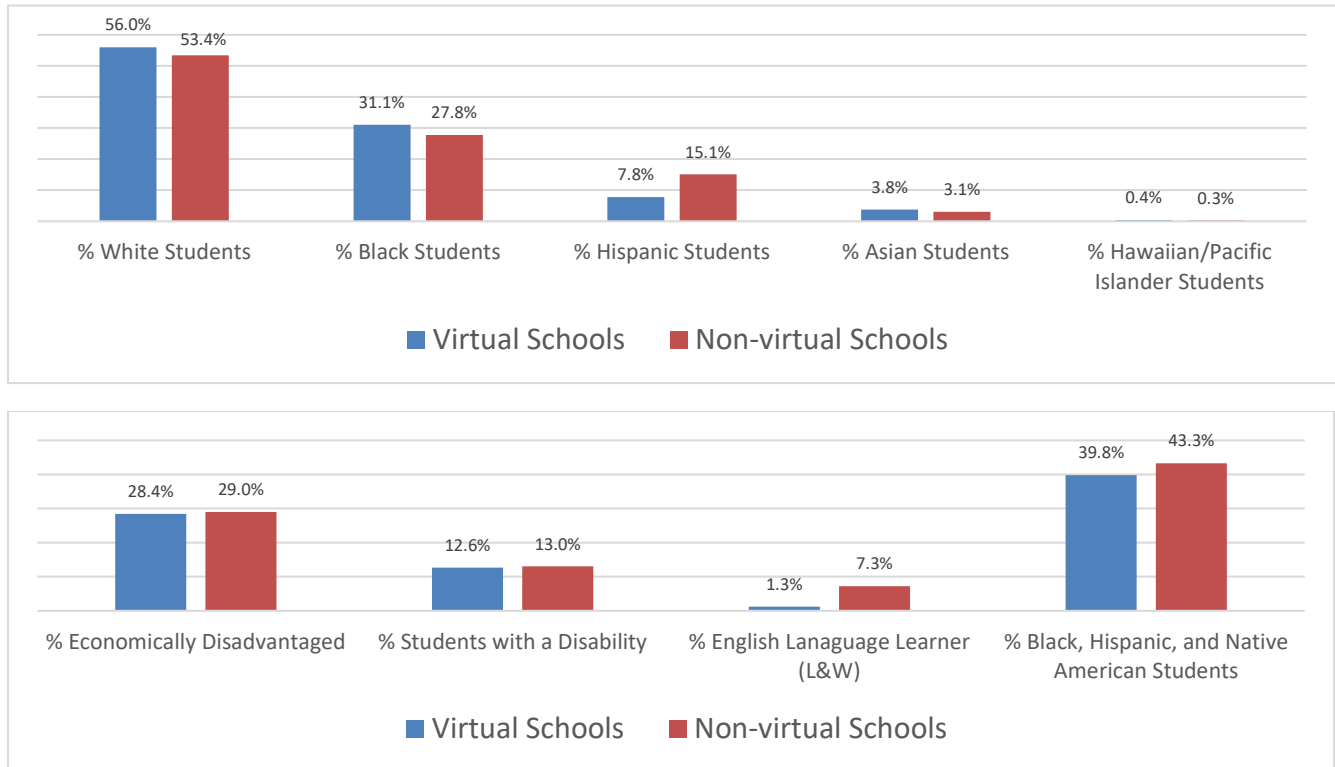

Figure 3: Number of Virtual Schools by Available Enrollment Type – SY2021-22

Student Enrollment

Student population characteristics within public virtual schools and non-virtual schools are similar³. Compared to non-virtual schools, public virtual schools held a smaller proportion of English Learners (EL) and Hispanic students during the 2021-22 school year. This data trend is not unique to Tennessee; a national study found that across the U.S., fewer EL students participate in virtual schooling compared to other student populations⁴.

Figure 4: Student Population Characteristics – SY2021-22

Student Mobility & Attrition

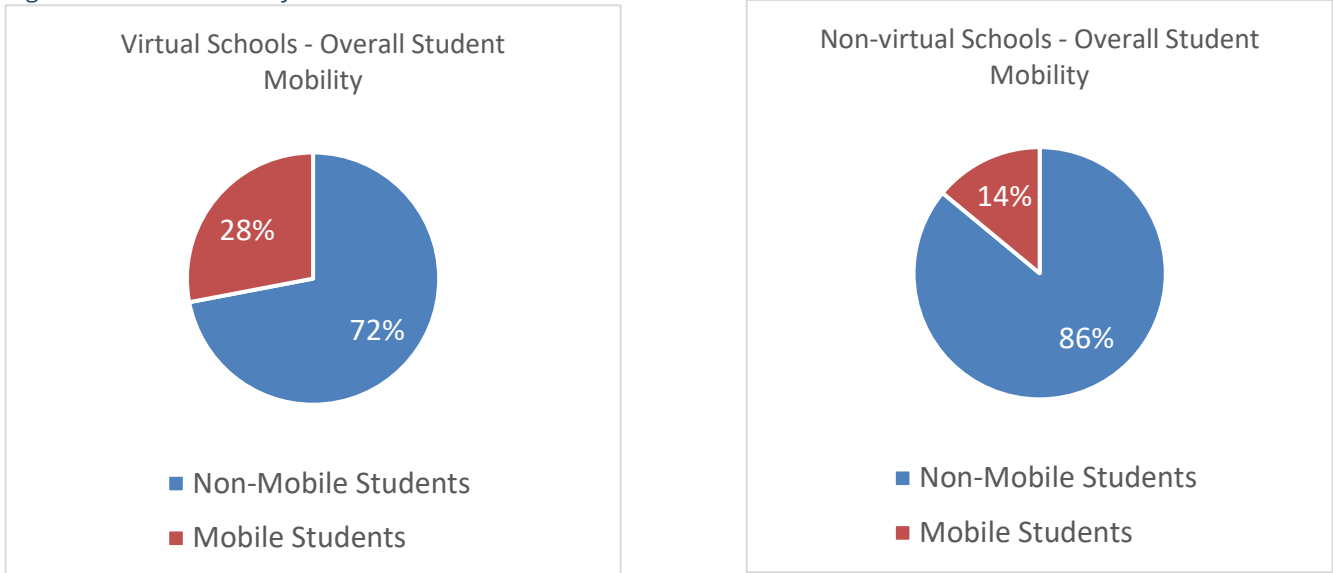

Public virtual schools in Tennessee have significantly higher mobility rates compared to non-virtual schools. Approximately 28% of students enrolled in a virtual school did not remain enrolled in the school for the entirety of the school year. Virtual school leaders plan for increased mobility and student transience by offering flexible scheduling and varying types of instructional modalities to fit student and

³ Student data within this report is limited to include data from schools within the 49 LEAs that operated a public virtual school during the 2021-2022 school year.

⁴ Molnar, A., Miron, G., Barbour, M. K., Huerta, L., Shafer, S. R., Rice, J. K., Glover, A., Browning, N., Hagle, S., & Boninger, F. (2021). Virtual Schools in the U.S. 2021. [nepc.colorado.edu. https://nepc.colorado.edu/publication/virtual-schools-annual-2021](https://nepc.colorado.edu/publication/virtual-schools-annual-2021)

family needs. Virtual school leaders have indicated that a consistently changing student body impacts their ability to monitor academic progress effectively. Furthermore, elevated student transience and mobility can lead to unfavorable academic outcomes⁵. For purposes of this report, student mobility rate is the percentage of a student body entering, reentering, and/or withdrawing on or after October 1st of a school year. Figure 5 presents the overall mobility rates for both students in virtual schools and non-virtual schools during the 2021-22 school year⁶.

Figure 5: Student Mobility Rates – SY2021-22

Coupled with mobility, virtual schools also have a significantly higher rate of attrition than non-virtual schools. Attrition rate is the percentage of the school’s annual student membership that exits the school and is not replaced by entering students during the school year⁷. On average, virtual schools had an attrition rate of 8% as compared to non-virtual schools of less than 0.1% during the 2021-22 school year. Virtual school leaders cite student mobility and attrition as a challenge to strengthening student academic outcomes within virtual schools.

⁵ Welsh, R. O. (2017). School Hopscotch: A Comprehensive Review of K–12 Student Mobility in the United States. *Review of Educational Research*, 87(3), 475–511. <https://doi.org/10.3102/0034654316672068>

⁶ Virtual school mobility rate: Percentage of the virtual school’s yearly student membership that enters (enrolls) for more than one (1) day on or after 10/1 or exits (withdraws) from the virtual school on or after 10/2 and before the last month of the school’s academic calendar.

⁷ Virtual school attrition rate: Percentage of the virtual school’s yearly student membership, enrolled for more than one (1) day, which exits (withdraws) from the virtual school on or after 10/2 and before the last month of the school’s academic calendar.

Accountability

Public virtual schools in Tennessee operate under the same legal and regulatory framework as all other public schools in the state. [Tenn. Code Ann. § 49-16-213](#) frames additional accountability measures that focus on student achievement growth, as represented by the Tennessee Value-Added Assessment System (TVAAS). TVAAS composites are one-year scores reported on a 1-5 scale⁸. If a virtual school demonstrates overall student achievement growth (school-wide TVAAS composite) at a level 1 or “significantly below expectations” for any three consecutive years of the school’s operation, the commissioner of education has the authority to enforce an enrollment cap or direct the establishing LEA to close the school. The department shares accountability data for virtual schools in the yearly Tennessee State [Report Card](#). This report is a vital tool for parents and families seeking comprehensive information about school performance.

Academic Outcomes

During the 2021-22 academic year, non-virtual schools demonstrated a higher rate of school-wide academic success compared to virtual schools as illustrated in Figure 6. Moreover, 31% of public virtual schools achieved a school-wide TVAAS composite score of 3 or greater, indicating academic growth. This figure contrasts with the percentage of non-virtual schools (66%) that achieved a school-wide TVAAS score of 3 or greater.

Virtual schools and non-virtual schools showed comparable school-wide TVAAS composite growth score results when evaluated against their respective LEAs. In the 2021-22 academic year, 64% of virtual schools secured a school-wide TVAAS composite score equivalent to or exceeding their establishing LEA. This compares closely to the 67% of non-virtual schools that achieved the same benchmark.

Figure 9 emphasizes the progress that public virtual schools have made to match or surpass their establishing LEA’s TVAAS composite score. Notably, the percentage decrease of virtual schools scoring equivalent to or higher than their establishing LEA, as seen in Figure nine, correlates with the swift increase of new virtual schools between the 2018-19 and 2020-21 academic years.

⁸ Appendix H outlines TVAAS effectiveness levels

Figure 6: Percentage of Students On-track or Mastered by School Type – SY2021-22

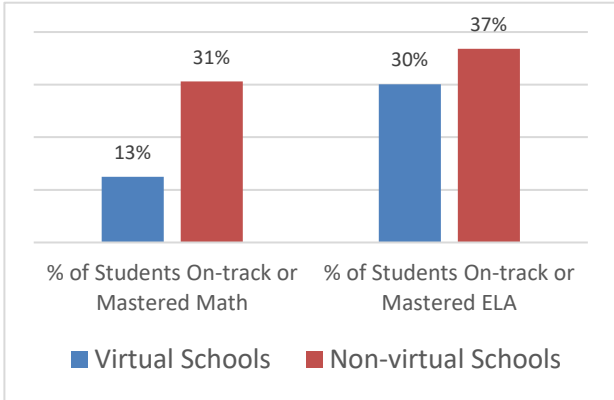

Figure 7: Percentage of Schools by TVAAS Overall Composite Score – SY2021-22

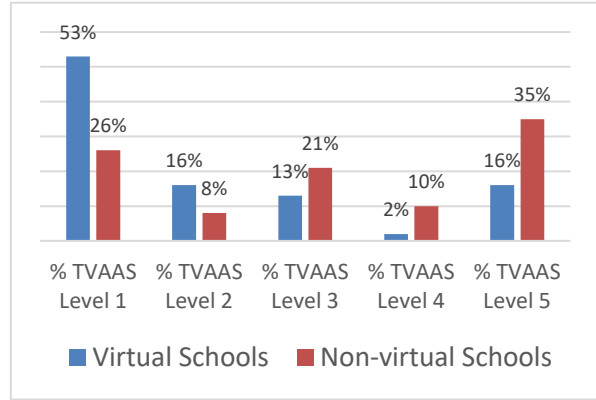

Figure 8: Percentage of Schools by School Type: School TVAAS Overall Composite Score Compared to LEA TVAAS Overall Composite Score – SY2021-22

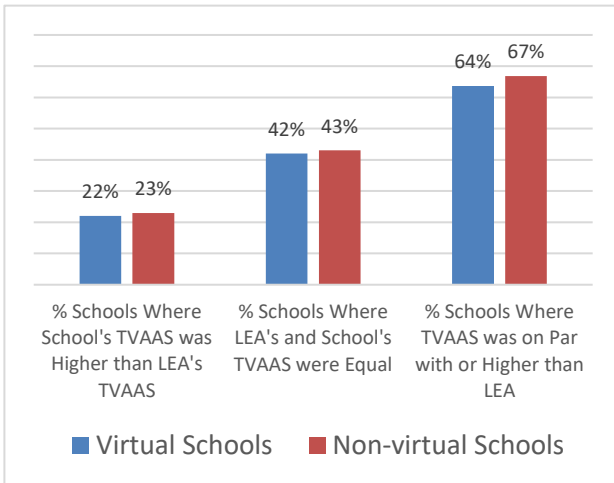

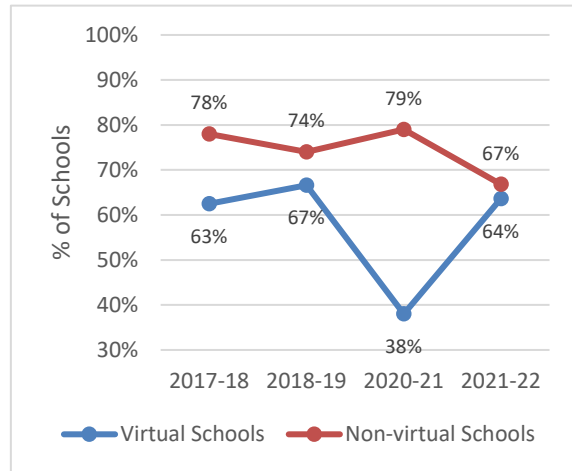

Figure 9: Percentage of Schools Earning TVAAS Composite Score Equivalent to or Higher than LEA – Across Years

School Recognitions

Each year, in accordance with Tennessee's accountability system, as well as federal and State law, the department recognizes schools for their success, as well as those needing additional support. The following section expounds on school recognitions identified from 2021-22 school accountability data and protocols.

Reward schools, as defined by the department's [2021-22 accountability protocol](#), are schools that earn an overall rating of 3.1 or higher and are not identified as Priority, Targeted Support and Improvement (TSI), or Additional Targeted Support and Improvement (ATSI) schools. Schools serving K-8 students are evaluated on four indicators, including achievement on the Tennessee Comprehensive Assessment Program (TCAP) assessments, TCAP assessment growth over time, rates at which students are Chronically Out of School, and performance on the English Language Proficiency Assessment (ELPA).

In addition to these four indicators, high schools are also evaluated on Graduation Rate and *Ready Graduate Rate*, or the rate at which students graduate while also having achieved milestones associated with college and career readiness. Schools are recognized as a Reward school when they demonstrate high levels of performance and/or improvement in performance by meeting their annual measurable objectives across performance indicators and student groups. Table 1 and Table 2 below highlight school designations attributed during the 2022-23 school year designated from 2021-22 accountability data.

Table 1: Virtual Schools Designated as a Reward School

Reward School	
Establishing LEA	School
Bristol City Schools	Tennessee Online Public School

Priority and Targeted Support Schools

Tennessee designates schools in need of improvement as Priority schools. These schools are eligible for additional funding and receive support from the department to develop evidence-based school improvement plans. These plans are based on items identified within the individual school’s needs assessment and root cause analysis. Priority schools are designated at least every three (3) years, but schools can exit the list annually if they meet specific performance criteria. The following schools were identified as Priority schools during the 2022-23 academic year from 2018-19 and 2021-22 accountability data.

Table 2: Virtual Schools Designated as Priority Schools or Targeted Support Schools

Funding

As delineated in [Tenn. Code Ann. § 49-16-204](#), Tennessee law assures that public virtual schools are provided the same resources as other public schools operating in Tennessee. LEAs have the authority to allocate funds from both state and local sources for the establishment and operation of their virtual schools and virtual education programs. Appendix G provides a comprehensive overview of Basic Education Program (BEP) funding for all operational virtual schools during the 2021-22 school year. Both state and local funding shares are set based on each county's fiscal capacity, or ability to raise local revenue; counties with higher fiscal capacities receive less state funding and must contribute more local matching dollars than counties with less ability to raise local revenue. The appendix provides a complete breakdown of this data, presenting figures on a collective as well as a per-student basis⁹.

Actions Taken to Strengthen Virtual Education in Tennessee

Virtual education serves as a robust, flexible educational pathway for Tennessee students. To ensure that all students receive quality educational services, the department has set forth a focused effort to strengthen virtual education across the state. Supports provided by the department cover a broad spectrum, from crafting operational guidelines to fostering partnerships between virtual and non-virtual schools. The list below outlines strides that the department is taking to strengthen virtual education:

1. The department developed guidance that provides clear operational parameters for the various types of virtual education permissible in Tennessee.
2. The department strengthened and expanded the school authorization process to ensure that applications submitted by an LEA to open new virtual schools or expand existing virtual schools align to all applicable state statutes, rules, and best practices as defined by the department.
3. The department refined and enhanced the virtual school monitoring process to focus on the operational, academic, and fiscal viability of virtual schools, to ensure they meet the highest standards of quality education.
4. The department fostered collaboration between virtual and non-virtual schools and partnered with school leaders to identify innovative ways to meet student needs through virtual education.

⁹ Data provided by Tennessee Department of Education Finance Department

Conclusion

The significant growth in the number of schools that utilize virtual education highlights the increasing demand from Tennessee families for flexible and diverse educational opportunities. Despite the growth and increasing popularity of virtual education, high mobility and attrition rates within public virtual schools have impacted school-wide academic outcomes. Furthermore, school leaders have cited that finding high-quality, state-approved instructional materials to utilize within their public virtual schools is a challenge. To strengthen virtual education across the state, the department has established a dedicated division to address challenges that are unique to public virtual schools and virtual education programs. To ensure that Tennessee students receive high-quality educational services regardless of learning modality, the department has provided strategic supports to enhance the quality of virtual education across the state.
