

SAMPLE INSTRUCTIONAL GUIDE B GRADE 3 SOCIAL STUDIES

To support social studies instruction in Tennessee and in response to concerns from the field over gaps between the current (2014) and revised (2019) Tennessee Academic Standards for Social Studies, the department has created instructional guides. This instructional guide outlines a sample plan for addressing the gaps between the current (2014) and revised (2019) social studies standards.

The resources found in the instructional guides are designed to support social studies instruction and are aligned to the Tennessee Academic Standards for Social Studies. They are intended to serve as a model for educators to reference as they design units and become more familiar with the revised standards.

To prepare to use this guide, teachers should thoroughly review it in its entirety, including the linked resources. These resources are intended to help guide teacher instruction and to support students in thinking deeply about social studies content, concepts, and skills. These guides (and resources) are only suggestions, and teachers should use their own judgment as to which resources they should employ for their students and which should be modified for their classroom. A variety of instructional strategies should be used to teach the content; these instructional strategies are local decisions.

Important Note: *In addition to thoughtful preparation using these resources, there are additional components for which educators will need to plan and prepare. This additional preparation includes, but is not limited to, reviewing resources for age appropriateness, adjusting information for specific classroom instruction, and planning the pacing of each quarter. If districts are not scheduled into quarters, educators may need to consider modifying the division of the standards to optimize timing.*

Sample Instructional Guide B

Grade 3 Social Studies

The following pacing is aligned to the **current** AND **revised** Tennessee State Standards. The resources shown below are examples for teacher use and are not required. It is up to the local districts and teachers to review resources for appropriateness within their schools.

Please note that some standards are in bold. These standards should be featured in the 2018-19 school year as they will help to prepare students for the 2019-20 standards. The standards that are not bolded are now supporting standards and will no longer exist in 2019-20.

Quarter 1: CURRENT STANDARDS

World Geography: Physical (standards in bold should be featured)

Third grade students will learn about the major components of world geography and world cultures. Students will develop skills across the six essential elements of geography: world in spatial terms, places and regions, physical systems, human systems, environment and society, and the uses of geography. Students will analyze the impact of physical and human geography on cultures in times past and present.
